

The Idea of the newspaper
and radio staitons
and tv stations
all being under the
same corporate control makes me SICK !

our small town has been waiting for a license
for a small 100 watt community radio station
and this seems to even be to much to ask for.

yet the brats at the head of the FCC
think , or should we say are told to think
that we MUST remove all 'public-interest' law
that 'might' slow down the corporate sell
out of the american media...

the telcom act of 1996 was PURE EVIL
do not give our media , our minds ,
our freedom to the likes of Murdoch
and clear channel.

give it back to the public , 100 watts at a time
using low power community radio..

only then can the voice of the public
get into THIS debate!

in our area we have only one newspaper
there is really no local radio news
maybe if there was more owner ship of the
30 or so local stations we could get better news.
but citadel and clearchannel downsized the
news dept , hell even got rid of the news room's!
now you want to let them buy out our local paper
'merge' purge , downsize and layoff
you must be crazy , or very greedy!

really you guys should just kick back
and not remove any 'public' laws...

with this war.....
now is not the time to let the public gard down...
you dont want to be the FCC that
'let our gard down'

do you ???

I worked at radio stations for 20 years... how about you?
